<b>Problem</b> All of the EOS project mail is forwarded to three servers in the HAC organization. The second server has been permanently removed from service and the third cannot deliver mail to the Internet. You see the problem.			
<b>Proposed Solution</b> We want to reclaim saturn (capital sparac 10 on the computer floor) and set it up as a backup mail server on the GFSC subnet. This machine will be completely dedicated to mail delivery and not allow logins from anyone but HTSC admins.
